

My mother lives alone and has been diagnosed with dementia. She wishes to remain in her home for as long as possible. When I began inquiring about home health assistance in 2009, Age With Grace was recommended to me by several people, including my mom's physician and our estate attorney. As my mom's needs have increased over the past 20 months, the wonderful caregivers from Age With Grace have adapted to these changes, and always treated her with kindness and respect.

Because I live in another state, it is crucial to know that my mom has daily companionship and assistance. Working with Age With Grace has allowed my mom to retain her independence, while providing me with peace of mind. I highly endorse this agency for any type of elder care needs.
