

My 83 year old mother-in-law developed several compression fractures in her spine and needed 24 hour care for several days after her surgery. I contacted the Hospital and was given several names of agencies that could help our family with home care while my mother-in-law recuperated from her operation.

I contacted several of the agencies looking for that special one that I felt comfortable hiring for our family and was thrilled to contact Mary Grace with Age With Grace Senior Care. I learned after contacting several references that Age With Grace was the agency that helped the Director of the Hospital and other hospital staff that needed home health care services. After speaking with the Director herself, I felt confident that this was the senior care program for our family.

Mary Grace was patient in answering all of my questions and concerns and was even willing to go to the hospital and meet with my mother-in-law personally to answer any of her questions. She visited for quite some time and made my mother-in-law feel comfortable in having a member of this agency help her in her home.

Age with Grace was a lifesaver for our family. We were able to feel confident that our mother was taken care of in her own surroundings where she felt most comfortable. We would highly recommend this company to anyone that needs home healthcare. We plan to use Age with Grace again in the future when my husband and I go away for vacation knowing that our mother will be in good hands and well taken care of by the people that work for Age With Grace.

Thank you,  
Paula
